

JOB TITLE: Senior Analyst - Financial Planning and Analysis
LOCATION: Boston or Remote Flexibility
POSITION: Full-Time
REPORTING TO: Corporate Treasurer in Boston

OUR COMPANY

Global Container International Holdings, LLC (“GCIH”) is seeking a highly qualified individual for the role of Senior Analyst - Financial Planning and Analysis. Candidates from throughout the United States are eligible to apply as the position will have remote flexibility.

GCIH is a leading owner, manager and lessor of marine cargo containers that are leased to global and regional shipping lines throughout the world. We currently own a fleet of over 300,000 twenty-foot equivalent container units and are growing rapidly. The company was established in 2018 and has built its business utilizing a highly efficient and dispersed workforce model, resulting in a streamlined overhead profile. As we embark on our next phase of growth, we will be hiring a few select individuals to augment our deeply experienced management team and existing workforce (see <https://gcxint.com/>).

JOB DESCRIPTION

Our Senior Analyst-Financial Planning and Analysis will support prudent financial management and strategic corporate decisions through data analysis, interpretation, reporting, and modeling.

RESPONSIBILITIES

- Creation and refinement of a multi-year forecasting model
- Co-Development (with senior management) of key assumptions relating to industry metrics, growth metrics, revenue dynamics, direct container expenses, new equipment costs, overhead and capital structure
- Monthly preparation of actuals to forecast with robust flux analysis and explanations
- Quarterly preparation of board packages with fulsome explanation of financial results, variance analysis and roll-forward expectations
- Annual and mid-year budget and forecast preparation
- Development of multi-year forecast and scenario analyses
- Advancement of a robust business valuation framework that can be utilized to evaluate the outcomes of various cash-flow and earnings-based forecasts
- Ad hoc projects including analytic support on capital markets transactions and lease pricing

REQUIREMENTS

- 3 - 5 years of experience in an FP+A leadership role, preferably in financial services or leasing
- BS degree in Accounting, Finance or Quantitative Analytics
- Deep fluency in Excel-based modelling
- Prior experience working cross functionally among sales, operations and finance leadership to develop assumptions and realistic analytic cases for management review and discussion
- Prior experience developing and evaluating valuation-based analytics
- Strong presentation skills and experience working at senior management and/or board level

Should Have

- Experience with PowerPoint presentations at board level
- Ability to travel periodically within the United States
